

GRESILVA VERTICAL GRILL GV3

TRIPLE CHAMBER SMOKELESS ELECTRIC VERTICAL GRILLER WITH HEATED WARMER

GRE.V3.A10

GRESILVA GV3 VERTICAL GRILLER - REAL BARBEQUED CHICKEN NO SMOKE - NO FAT - EFFICIENT - HEALTHY - REAL FLAVOUR

The Gresilva Vertical Grill line is perfect for real barbequed chicken, free from fat and carbon residues, healthy, and with all the flavour that customers expect, while being fast and efficient in operation. It is a practical and healthy way of cooking with 100% natural heat emission and providing the perfect environment for the quality and taste of the grilled food yet still preserving its nutritional value.

In the GRESILVA® VERTICAL GRILL, the heat source is positioned to one side, so there are no flames, which means that no benzopyrenes are formed. These are highly carcinogenic substances which are formed whenever organic material, especially of animal or vegetable origin, is charred.

The GV Series, includes an unique inbuilt water bath that directs all fats and waste into it without touching any heat source, eliminating most smoke and fats and allowing an easy clean at the end of the day. The grids work independently with timers allowing the most efficient use of labour and versatility of different products within the different chambers. Cooking temperatures are achieved quickly in minutes and products such as mouth-watering barbeques chickens can be perfected within 20 minutes.

Gresilva Vertical grills are a trademarked and patented product, and the winner of multiple awards. Although originally designed for barbequed chicken, the GRESILVA® VERTICAL GRILL is also successful for other meats kebabs, ribs, burgers, steaks, wings and so much more.

MAIN FEATURES

ECONOMICAL

- The grids have independent connections and are easily removed for cleaning.
- Low energy consumption (when the grill is working at 100%)
- Each compartment has its own minute timer which allows control of the cooking time of each grid separately, with a buzzer, or without turning off the grill.
- Efficient use of labour as the operator is freed while the food is being grilled in a perfectly controlled cooking environment.
- Temperature adjustable from 50°C to 300°C
- Solenoid valve timer on the water inlet.

FAST

- Turn on, and a couple of minutes later, you're ready to start cooking.
- Steady and consistent heat even during the busiest periods thanks to superior insulation properties.
- Fast high-quality cooking with great results on a large range of foods.
- Barbequed chicken in 20 minutes

ECOLOGICAL

- Minimum consumption of water
- Minimum smoke extraction
- Complete removal and collection of cooking fats with ease.
- No emission of carbon monoxide.

INNOVATIVE

- Vertical grid system
- Lateral heat source
- 100% natural heat emission.
- Waste materials fall directly into the water without touching the heat source.
- In built heated warming chamber for keeping products warm.

HYGIENIC

- Little smoke is given off as there are no flames
- 90% of the waste fats remain in the water, and do not clog up the ventilation ducts;
- Quick and easy daily cleaning – all that is needed is to wash the waste collection tray and the grill racks, made easier with the use of the washing tank
- Exhibitor smoke conductor.
- Wheels for easy movement

ROBUST

- Stainless steel structure AISI 304;
- Ceramic fibre insulation.

SPECIFICATIONS

Number of chambers/ grates	3
Capacity/chickens	9
Weight	179 Kg
Rated power	10.4kw, 400V, 3N-, 16A (L1) 16A (L2) 11A (L3) (L3)
Temp range	50 - 350 °C
Outlet drain waste connection	1" connection for waste drainage (Can be manually drained where waste drain unavailable)
Inlet water supply	¾" threaded tap at maximum 800 Kpa supply pressure
Warranty	4 Years Parts 2 years Labour

DIMENSIONS

Machine dimensions WxDxH (mm) - Cooking chamber	735 x 798 x 1540
Machine dimensions WxDxH (mm) - including vertical grid support	735 x 1255 x 1540
Machine dimensions WxDxH (mm) - including maximum extension opening for vertical grid	735 x 1980 x 1540

GRESILVA VERTICAL GRILL GV3

TRIPLE CHAMBER SMOKELESS ELECTRIC VERTICAL GRILLER WITH HEATED WARMER

GRE.V3.A10

OPTIONAL ACCESORIES

Vertical Grid XS 0.31 / 8mm	Vertical Grid S 0.75 / 19mm	Vertical Grid XL 1.22 / 31mm
GRE.V1.J40  Thin to medium thickness. Sausages, pork belly, ribs, steaks, kebabs, wings, burgers, quails and more.	GRE.V1.J10  Medium thickness Chicken size 1kg, Ribs, Quails, thick sausages, chorizo, chicken pieces and more.	GRE.V1.J30  Twin locking position. Medium to large thickness Everything in GRE.V1.J10 plus chicken size up to 1.8kg and larger ribseces and more.
Gutter / Drain	Exhaust Module Smoke filter	Exhaust Ductwork for Smoke filter
GRE.CA.A50 	GRE.V3.P10  This filter is built from synthetic selected fibers which are easy to dismantle, clean and eliminate smoke.	GRE.V2.P30 
Cleaning tank TV3	Grid Transporter (5 Grid)	Scraper
GRE.T3.M10  Holds three grids and is designed to let you clean the grill racks of the GRESILVA® VERTICAL GRILL more simply and effectively. Fill the tank and immerse the grill racks whenever they are not being used.	GRE.P5.M10  Designed for the transport of the grids between the grill and the Grill Cleaning Tanks and is highly beneficial	GRE.V1.E40 

GRESILVA VERTICAL GRILL GV3

TRIPLE CHAMBER SMOKELESS ELECTRIC VERTICAL GRILLER WITH HEATED WARMER

GRE.V3.A10

HOW IT WORKS

Timers let you control the cooking time of each grid individually. It gives the operator a warning beep signal, but it does not switch off.

Line **GV**eco

*Innovative, fully patented,
friendly to the environment
and your health*

EXHAUST LAYOUT

DRAINAGE SYSTEM

A composite drainage system by a water collection container of the receiver drawer to be connected to the grease box.

Waste drainage box

1 Tube for waster drainage
