A one solid door underbench freezer designed for busy kitchens at venues such as restaurants, clubs, pubs, and cafés. The freezer is engineered to continue working effectively in ambient environments of up to 40°C (climate class 5). With GEMS-certified 5L1 performance, standard storage temperatures range from -21°C to -18°C, or are adjustable via the SKOPE-connect smartphone app from -26°C to -12°C. The freezer is made from food-safe 304 AISI stainless steel throughout the interior and exterior. The 700 mm deep cabinet with a fully welded integrated worktop can be configured to suit multiple installation options. At 850 mm overall height, it can be positioned under a bench on the supplied castors, positioned on a pre-installed plinth by removing the castors, or fitted with optional legs for a finished working height of 900 mm. The one self-closing solid swing door is fitted with an ergonomic 3 mm gauge stainless steel handle, built-in barrel locks, and a stay-open position of 90°. Inside the freezer, there is a door-activated LED light and 2 × 304 stainless steel GN1/1 shelves on double-row runners, which can also hold an additional GN1/1 pan. The freezer is fully configurable, with the door swappable for either two or three GN drawer bays. The slim left-hand service compartment features an easily removable and cleanable condenser filter. The fully removable refrigeration cartridge uses R290 natural refrigerant for low energy consumption, low heat discharge, and low noise output. Right-hand services are also available. It is fully front breathing, with no side or rear clearance space required and the cartridge can be easily removed in line with best practice for safe servicing of flammable refrigerants. The freezer includes a smart controller that connects to the free SKOPE-connect app to enable you to set temperatures and alerts, monitor temperatures and energy, and more. The freezer is certified to all Australian and New Zealand refrigeration and electrical safety standards.
